

# NORDIC DEMOCRACY FORUM 2024

## PROGRAM

NOV 20<sup>TH</sup>-21<sup>ST</sup>

Stockholm, Sweden

# INVEST IN THE FUTURE OF OUR NORDIC DEMOCRACIES TOGETHER

Over the course of the past few years the safety and security of Nordic communities have changed. New and unprecedented threats today pose profound challenges to our politics, our institutions, and our way of life. Conflict in Europe and in the Middle East, a proliferation of digital harms from dis- and misinformation to artificial intelligence, cross-border crime and increasing polarisation is placing our democracy, social cohesion and security under pressure.

Despite the Nordics being a relatively small and peaceful region, these challenges underscore the need to safeguard the democratic principles that have fostered trust and cohesion in Nordic societies and kept our communities secure, robust and prosperous.

Against this backdrop, it is timelier than ever to unite and act and the inaugural Nordic Democracy Forum represents a timely moment to do so. As a Forum participant you are invited to unite with Nordic peers to set the direction and initiate shared action. All to ensure that the Nordic region and cities remain beacons of democracy, safety and security in the times to come. We hope The Nordic Democracy Forum will enable fresh and future-focused conversations and partnerships; and not be business as usual. The Forum will be about identifying and proposing solutions. It will require all participants to come to the table with an open mind, realism and determination.

Across the two days of the Forum, you are invited to participate in working sessions with peers as well as new partners from other sectors. Several sessions will feature informal discussions in smaller groups, with an emphasis on developing tangible ways forward and new ideas to build on together. This will give you the chance to shape the path ahead to accelerate democracy and security in the Nordics and your own organisations by hopefully taking back fresh ideas and partners to boost your efforts.

The Nordic Democracy Forum will feature ministers, mayors, national and local leaders, representatives from organisations, universities, civil society, tech companies, foundations and youth organisations. Conversations will focus on cross-sectoral problem-solving with the city and local level at the core.

With your active participation, we hope to capture the visions and ideas that will ensure we stay on the forefront in our prevention efforts to keep the Nordic a safe, secure, and inclusive place for all in the years to come.

We look forward to welcoming you and working together in Stockholm.

We will discuss the current state of our democracies, trust in public institutions in a hybrid threat era, and how to work with citizen engagement and mobilisation. Additionally, we will be taken through the hateful and polarising rhetoric that is threatening our cohesion and driving groups apart. And how we need to rethink youth engagement in our democracies and democratic conversations by reinventing participation in schools or bringing youth and politicians together. The masterclass is a blend of panel discussions, presentations and conversations that will inspire future interventions for cities and communities to engage in and support a vision of a democracy for all.
